Good Things Are Happening!

We can all agree that **“Good Things Are Happening Because of Our Efforts”**. Every day we witness positive changes taking place in the United States because of the millions of people supporting efforts like the **Buy American Made Campaign**.

Use YOUR Purchasing POWER!

a major improvement in the number of products available that are made in the United States. In recent months we also hear that **jobs in America have increased** and that more full-time and skilled jobs have become available as a result of the reduction of regulations and taxes on businesses.

Consumer demand for items made in America has also encouraged businesses to invest more in the United States. **With more investment in America we are also seeing an expansion of Vocational Education Classes in junior and senior high schools and community colleges.** With more skilled graduates we will see many more full-time jobs created as businesses increase production of their product lines with made in the U.S.A labels to meet the demands of America’s consumers.

Thanks for promoting our efforts and remember that Good Things Are Happening Because of Our Efforts!

We Help Determine What is SOLD in America!

Every shopper knows that **“the marketplace determines what is sold in America and at the places where we shop”**. Today, cash register technology provides immediate reports to business owners of what’s being sold and what is not being sold.

If an item is being purchased, it’s replaced so it’s available for future customers. If an item is NOT being purchased, the store will focus on reordering items that are being sold. **By seeking out and buying the American made items you need, you are helping determine what will be stocked in the future at the stores where you shop.**

Support American Based Businesses that Manufacture and Assemble Products in the U.S.A.

The entire **Buy American Made Campaign** is directed to ensure that more American made items are circulated in our stores as we work to promote the American

made label and reduce the massive build-up of foreign items that have filled our stores for too long.

Our message is very basic and has been very effective. It demonstrates that we are working for the benefit of American workers and the importance of encouraging businesses that are expanding operations in America to do even more to get American made products sold in the United States. **The new global economy has brought about a lot of competition, which is good; however, in order to restore jobs in the United States we “America’s Consumers”, have to direct more of our purchasing power to support America’s private sector businesses that have the ability to restore the 50/50 balance between foreign and American made items that we so often promote.**

Thanks for spreading the word. Your participation is important.

Education Budgets are Being Finalized!

At this time of year, education budgets in states across America for the September 2019 school year are being finalized. As the budget process continues, everyone is asked to call your local school district office to urge them to promote subjects that will properly prepare America’s youth for the jobs now available and for the job opportunities that will need to be filled in the next 5 to 10 years.

It is always important to promote reading, writing, math skills and world history, but there also needs to be a major focus on the new type of job opportunities that are being created every day. We can all agree that junior high school students should be exposed to a variety of these career opportunities, and with computers, students have the opportunity to have virtual workplace experience, which is helping students select the career of their choice. In high school, every student should have had several classes that would place them on the path to long-term career opportunities which are needed in technology driven workplaces.

Students must be exposed to a full range of options from professions like medicine, education, law, and business, to vital trades like construction, plumbing, heating and air conditioning, welding and manufacturing, all of which are careers important to America’s economy.

As school boards meet to finalize their budgets, school superintendents need to hear from parents and taxpayers who want a more realistic look at how students are being prepared for the ever growing workforce in the United States. When you call, let them know you want your tax dollars to be used for an education that will offer students a career opportunity that will benefit them for a lifetime. Let them know graduates should be ready to apply for one or several jobs as they were in the past.

Kindly spread the word to your family and friends and call your local school superintendent’s office as soon as possible.

America’s Consumers are Making it Happen!

As more jobs become available in the United States, we have seen people feeling better about themselves and their futures. An important way for us to help create even more success is to **go out of our way to inform others about where we purchased the products that are made and assembled in the United States.**

With more consumers looking at labels and **spending more of their money on items made in America**, it has not only been helping maintain present jobs, but also helping create more jobs to meet the demands of America’s consumers.

For many years we have focused our efforts on promoting the **Made in America label** and the fact that America’s stores are now filled with an overwhelming amount of foreign made products.

We all know that we live in a **FREE MARKET ECONOMY** so it’s difficult to create laws to keep businesses in America. However, **there is NO REASON why the American people cannot continue to create the demand for American made products**, which they know are keeping American workers employed and allowing them to have jobs to support themselves and their families.

After 30 years of America being flooded by cheaper foreign imports, it’s our time to take charge of our own destiny and support the businesses and industries **employing Americans** from the point of production to the point of sale.

Kindly welcome your family and friends to visit: AmericanWorkersRadio.com, where we have several links that highlight the efforts of the **Buy American Made Campaign**.
