It's Great to See the Wave of Change in America!

If you are among the millions of people supporting the **Buy American Made Campaign**, you can feel good about being part of the **positive "Wave of Change in America."** Just a few years ago people were not concerned about the effects of outsourcing on America's industries. Many people thought the service oriented economy would grow and sustain America forever so they dismissed concerns about industries and jobs being lost in the U.S.A.

Today, people see things differently. **Now, because so many people have been speaking up where they shop, we are hearing that the concerns of AMERICANS are being discussed in corporate board rooms, at organization meetings, on television and radio programs, and in the print media.**

The **Buy American Made Campaign** is not meant to be just a lot of talk, it is meant to get people to speak up where they shop and make sure that business owners and purchasing agents see for themselves that customers are bringing about a **Wave of Change in America** with the main objective of restoring jobs for the American people and creating **more Made in America labels.** Your efforts continue to show business investors that featuring products made in the U.S.A. will not only ensure their profits and stability, but will employ people who are also their customers.

Read
The
Labels

When you shop remember that items with a **"Made in America label"** are clear evidence that Americans were employed from the point of production to the point of sale.

When the label identifies an item as foreign made, that means mainly sales, shipping and handling personnel are being employed. **If industries in the U.S.A. could restore a 50-50 balance between American and foreign made in every store possible, you will see an unbelievable change in job opportunities and in America's over-all economy.** It's going to take all of us speaking up and using our spending power in **support of America's businesses and American workers FIRST.**

Best wishes to you and yours for an enjoyable summer.

America's Consumers Are the Key to Success!

As more consumers are looking closely at labels to insure that products are truly made in America, not only listed as being distributed by an American company, various consumer reports state that **"Given a choice between a product made in the U.S.A. and an identical products made abroad, 78 percent of Americans would rather buy the American made product."** This is according to a national survey by the Consumer Reports National Research Center.

In speaking with supporters of the **Buy American Made Campaign**, the overwhelming response is that they want to see more American made products of every type in circulation and are concerned that large numbers of well known brand name products are now being produced outside of America.

**America's Consumers
are NEVER Powerless!**

The Individuals who were surveyed feel that **manufacturing the items used most often by America's consumers will help**

maintain and restore jobs for the American people and that the buying habit of America's consumers will help us reach this goal. Additionally, our supporters state that they are willing to pay more for products made in the U.S.A. because they know that jobs are important for their fellow Americans and buying American made is one of the most effective ways to **encourage American manufacturing.**

In this statement, I used the word America or American several times because I feel it's up to the American people to focus more of their spending power on products and services they know will help restore the jobs we need for American workers and the economy of the United States of America. Thanks for spreading the word to others and for supporting the **Buy American Made Campaign** because **America's Consumers Are The Key to our SUCCESS.**

Take Care of Our Own First!

Employment opportunity for all Americans is the main goal of the Buy American Made Campaign. The most impressive results of our efforts show that the American people are discussing their ideas, concerns and experiences and are going out of their way to direct more of their dollars to **support the products and services produced by American workers.**

In the process of supporting the businesses still operating in America, we find that **without a growing manufacturing base in the U.S.A. millions of the jobs lost to nations around the world will be impossible**

to replace. With modern technology there are many new ways to make products and employ people, and with new products constantly being invented and improved, there is no reason for any American to be without one or more employment opportunities. The goal of **American Workers Radio** is to get more industries, businesses, academia, government and individuals working together to restore jobs of every type that were lost over the last 30 years.

There is a very informative YouTube video titled **"Million American Jobs Project"** posted on the top right side of **AmericanWorkersRadio.com.** It clearly outlines what happened to JOBS in America. **Almost 4 million people to date have watched the "Million American Jobs Project" YouTube video.** I encourage you to look at the video and share the link with your family members and friends. Working together we have accomplished a lot of good for the cause of American workers and in the process encouraged businesses to remain and expand in the U.S.A. **The dismantling and exodus of America's industries took place over 30 years.** Unfortunately, America can't wait 30 years to restore its industries and jobs, so your participation is extremely important. **Look for, ask for and purchase as many items as possible made in the U.S.A.** Thanks for spreading the word.
